Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a composition for ophthalmic application comprising oil globules having an average size of less than 1 micron dispersed in an aqueous phase, said globules comprising: a surfactant component consisting essentially of one or two surfactants; a polar oil component; and a chlorite component, classified in class 424, subclass 429.
 - II. Claims 18-23, drawn to a method of decontaminating a contact lens, comprising soaking said lens in an ophthalmic solution of group I, classified in class 424, subclass 429.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the product can be used for materially different use, for example, Parikh et al(US6979456) . teaches a self-emulsifying composition comprising a hydrophobic component such as a mono-, di- or triglyceride, a vegetable oil, fish oil and a surfactant component consisting of one or more non-ionic surfactants. Furthermore, US4521375(Houlsby) teaches a

contact les sterilization system which utilizes materially different product such as aqueous hydrogen peroxide containing solution.

Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. Furthermore, the search required for invention of group I is not anticipating invention of group II, and thus, restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

1. No claim is allowed.
 2. All pending claims are subject to restriction/election requirement.
 3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is 571-272-0579.
- The examiner can normally be reached on Tuesday-Friday.
